Problem 60: Sort Numbers

Difficulty: Easy

Originally Published: Code Quest 2017

Problem Background

In this exercise you will simply sort a list of integers.

Problem Description

You will sort the numbers from least to greatest.

Sample Input

The first line of your program's input, received from the standard input channel, will contain a positive integer representing the number of test cases. Each test case will include:

- A comma delimited list of integers, one set per line, sort each line of the input file separately.

```
3
1,5,8,6,7,4,8,5,25,45,85,15476,3548,1,5,2,457
5,4,75,6
8,7,5,987,4815,6873,548,3651536,53
```

Sample Output

Your program should print out each line of numbers from least to greatest separated by commas with no spaces.

```
1,1,2,4,5,5,5,6,7,8,8,25,45,85,457,3548,15476
4,5,6,75
5,7,8,53,548,987,4815,6873,3651536
```
